

### GENERAL INFORMATION

Application	On line cut-off valve
Installation Procedure	See instructions for use
Material	Brass

### TECHNICAL DATA SHEET

	Description	Value
PRESSURE	Max. Working Pressure	260 bar
	Test Pressure	330 bar
	Hydraulic Collapse Pressure	> 750 bar
TEMPERATURE	Working Temperature	-40°C / +85°C
SOLENOID VALVE	Minimum Gas Flowing area	Orifice size 4.2 mm / CV is 0.33 28,3 mm <sup>2</sup>
	Voltage	12 V / 24 V DC
	Power absorption in all conditions	10 W (12 V) / 13 W (24 V)
	Opening $\Delta P$ between tank and pipes at 75% of Nominal Power (7,5 W) to which it assures the opening of the valve	360 bar
